

Download Information – Facebook

This guide walks through exporting your Facebook content as JSON — the format we need to build your AI assistant's knowledge base.

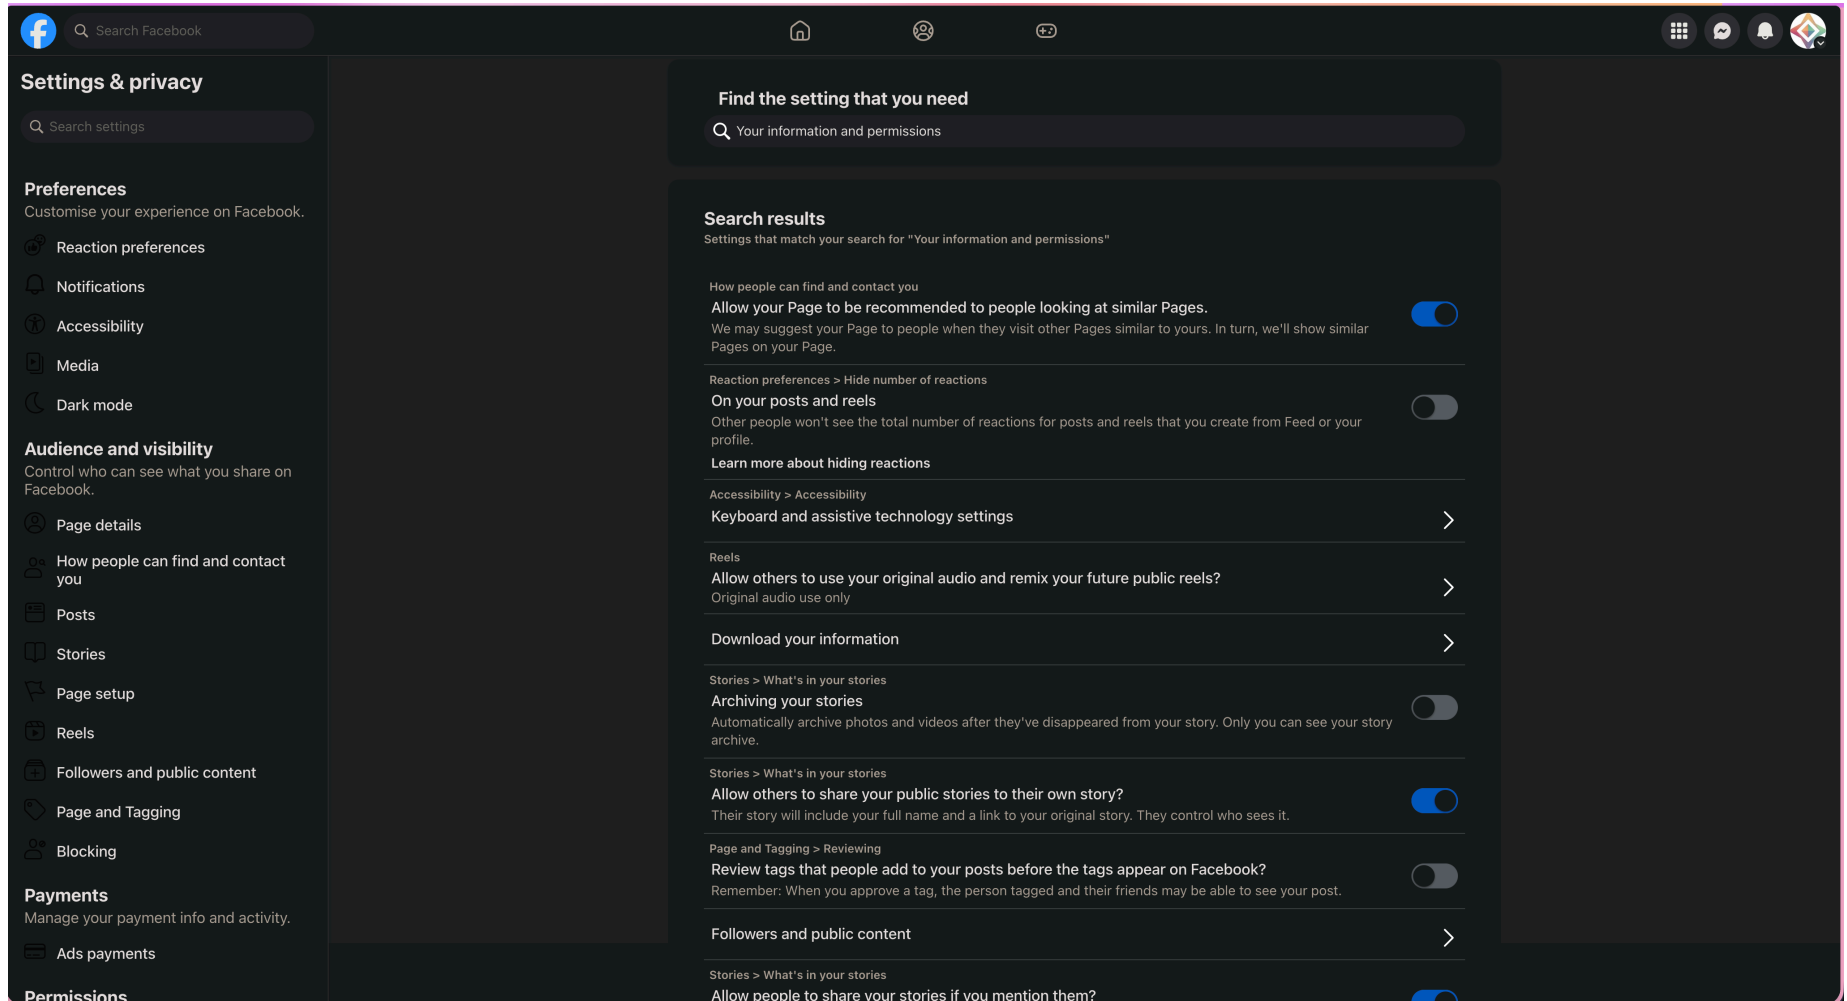

Step 1: Open Settings & Privacy

From your Facebook Page, click the **gear icon** or go to **Settings & privacy** in the top-right menu.

Step 2: Find "Download your information"

In Settings & privacy, search for "**Your information and permissions**" or scroll down to find "**Download your information**".

Step 3: Configure your download

On the **Download profile information** page, set these options:

- **Format:** JSON (not HTML — we need JSON to process your content)
- **Media quality:** Low (we only need your text/captions, not high-res photos — this keeps the file small)
- **Date range:** All time (so we get your complete content history)

Then scroll down to "**Select information to download**" and check the categories you want. At minimum, keep **Posts** checked. You can uncheck Messages, Facebook Gaming, and other categories you don't need.

Downloads

[Request a download](#)[Available files](#)

Select file options

You can choose the file format, media quality and date range for your download. HTML format is easy to view, while JSON format allows another service to more easily import the file. Media quality is the quality of your photos and videos but also affects file size.

Format
JSON

Media quality
Low

Date range (required)
All time

Select information to download

You can download everything or select the types of information that you want to download.

This profile's activity across Facebook

[Deselect all](#)

Information and activity from different areas of Facebook, such as posts that you've created, photos that you're tagged in, groups you belong to and more

Messages

Messages you've exchanged with other people on Messenger

[What's included?](#)

Events

Responses to events and a list of the events that this profile created

[What's included?](#)

Facebook Gaming

This profile's profile for Facebook Gaming

[What's included?](#)

Fundraisers

Fundraisers you've created, joined or donated to

[What's included?](#)

Groups

Groups that this profile belongs to, groups managed by this profile, and posts and comments within the

Groups that this profile belongs to, groups managed by this profile, and posts and comments within the groups that it belongs to

Step 4: Request your download

Scroll to the bottom and click **"Request a download"**.

Search Facebook

Download profile information

You can download a copy of this profile's information at any time. You can download a complete copy, or you can only select the types of information and date ranges that you want. You can choose to receive this information in an HTML format that is easy to view, or a JSON format, which could allow another service to more easily import it.

Downloading profile information is a password-protected process that only people with full control of this profile can access. Once your copy has been created, it will be available for download for a few days.

When you download your information, your download won't include information that someone else shared, such as another person's photos that you're tagged in.

You can still view this information at any time.

Start your download

Your download may contain private information. You should keep it secure and take precautions when storing it, sending it or uploading it to another service.

Request a download

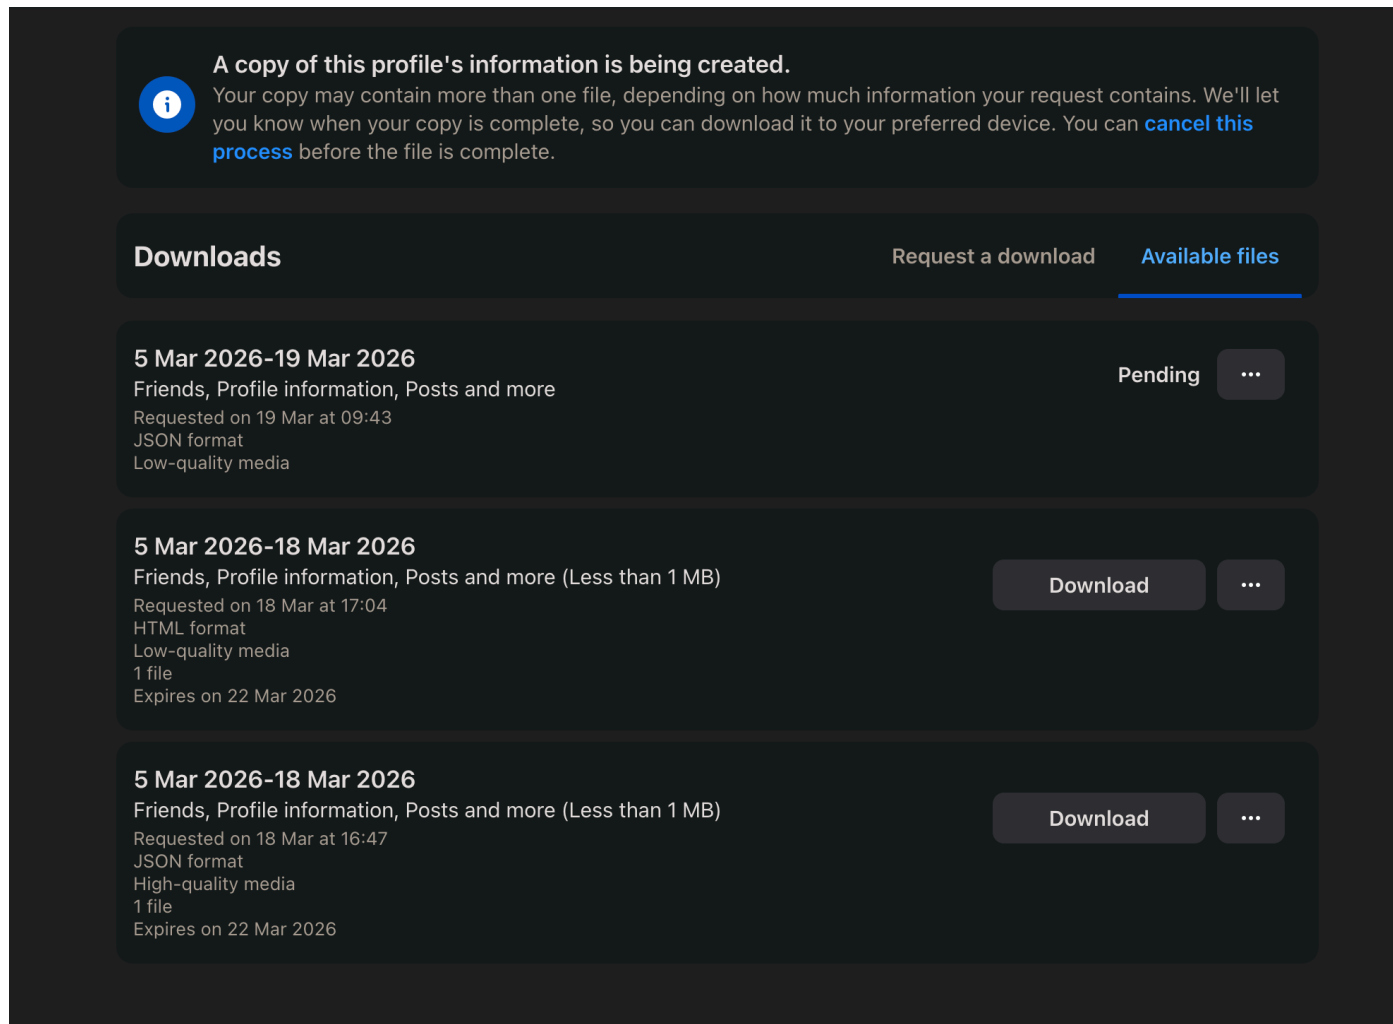

Step 5: Wait for the email

Facebook will prepare your data. This usually takes **a few hours** but can take up to a couple of days for large accounts. You'll receive an email when it's ready.

Step 6: Download the ZIP

Go back to the same page (Settings & privacy > Download profile information) and click the **"Available files"** tab. Download the ZIP file.

Important: The download link **expires in 4 days**, so grab it promptly.

What you'll get

A ZIP file containing your posts, photos, videos, and other content organized in folders. The key file we need is:

- └─ profile_information
 - | └─ profile_information
 - | └─ contact_info.json
 - | └─ profile_information.json
 - | └─ profile_update_history.json

 - | └─ your_posts
 - | └─ 122103137595124467.jpg

```
└─ profile_posts_1.json
└─ uncategorized_photos.json
```

Send us this ZIP (or just the `posts/` folder) and we'll handle the rest.

Quick checklist

- ☐ Format: **JSON**
- ☐ Media quality: **Low**
- ☐ Date range: Preferred time range to give AI intelligence upon
- ☐ Categories: at least **Posts** checked
- ☐ Downloaded within 4 days of notification
