

Download Information – Instagram

How to export data from the `@syft_influencer_test` Instagram account via Meta Accounts Centre.

Steps

1. Go to Accounts Centre → Profiles and personal details

Navigate to accountscenter.meta.com. You'll see the linked profiles — e.g. `syft_influencer_test` (Instagram) and Khoa Nguyen (Facebook).

Accounts Centre

Manage your connected experiences and account settings across Meta technologies such as Facebook, Instagram and Meta Horizon. [Learn more](#)

Your information and permissions

To download or transfer a copy of your information, go to Export your information.

Export your information >

Search history >

Your activity off Meta technologies >

App connections >

Manage contacts  >

Identity confirmation  >

Control what information Meta technologies can use to influence your experiences.

3. Create export

A dialog appears. Click **Create export**.

4. Configure export settings

Set the export options:

- **Profile:** `syft_influencer_test` (Instagram)
- **Export to:** Device · Once
- **Notify:** khoa@openmined.org
- **Customise information:** All available information
- **Date range:** All time
- **Format:** JSON
- **Media quality:** Lower quality

Then click **Start export**.

5. Export submitted

Meta confirms the export is being prepared.

You'll receive a notification at your email when it's ready

You have **4 days** to download the file.

Notes

- Format is **JSON** (not HTML) — easier to parse for the syft-ingest pipeline
- Export includes all available data: posts, stories, reels, profile, comments, connections, messages
- Date: 2026-03-19
